

# Decorative Metals

Put a spotlight on drama.

 Wilsonart® Contract  
PORTFOLIO

# Reflecting on style

The Wilsonart® Decorative Metals collection is the hi-tech hybrid of industrial flair and sophisticated design. Whether used for vertical or ceiling applications or as accent banding on countertops, the Wilsonart Decorative Metals line is surprisingly adaptable and virtually unbreakable. Available in mirror finish, anodized and non-anodized aluminum, the uses and effects of Wilsonart Decorative Metals are only limited by one thing. Your ideas.

## PRODUCT REFERENCE

### WILSONART DECORATIVE METALS

#### Product Description

Wilsonart Decorative Metals are designed for vertical interior or ceiling applications where a special accent is required or a special mood is desired.

#### Product Composition and Availability

##### Type 401

A-Look Mirror Quality Decorative Metal panels consist of two thin skins of aluminum alloy continuously bonded to a thermoplastic core, then electroplated in a chrome finish.

##### Type 414

A 26-gauge steel sheet featuring a Galvalume® finish. The steel is coated with an aluminum-zinc alloy with a clear acrylic coating on both sides. The metal features a decorative faceted finish on both sides — usable 2 sides (protective film applied one side only). **Steel fabrication tools are required. Facet size may vary.**

##### Type 416

Artisan Group non-anodized aluminum alloy panels feature textured designs in five patterns applied from border to border, creating a dimensional appearance. Panels are coated with a clear polyester resin to prevent oxidation and protect the beauty of the design.

Wilsonart Decorative Metals are GREENGUARD® Indoor Air Quality Certified.

##### Type 418

Anodized and decorative aluminum (Types 419 and 416) are bonded to a phenolic backer for fabrication following **HPDL techniques for flat surfaces only. NO EDGE TRIM OR STRIPS.**

##### Type 419

A solid sheet of aluminum is produced with a decorative, anodized finish and color. The other side is prepared to facilitate bonding to a suitable substrate. (Keep this surface free of grease, oil, or other contaminants.)

#### Basic Limitations

All decorative metals are designed for interior applications. Galvalume/Type 414 can be used for exterior applications.

**Horizontal applications are not recommended.**

#### Fabrication and Assembly

For comprehensive fabrication instructions, consult the Decorative Metals Fabrication Manual (BR0406).

### TECHNICAL DATA AND WARRANTY
